

**Product Name: EDTA-ZN-15**

**Chemical Name: Ethylenediaminetetraacetic acid, zinc disodium complex**

CAS-No: 14025-21-9

Formula: EDTA-ZnNa<sub>2</sub> (C<sub>10</sub>H<sub>12</sub>N<sub>2</sub>O<sub>8</sub>ZnNa<sub>2</sub>)

Molecular Weight:: 399.6

Characteristics & Application: It is a stable water soluble metal chelate,mainly used In agriculture and horticulture as micronutrient,and zinc is present in a chelated form.

**Appearance : White Powder/Microgranular**

**Zinc Chelated : 14.7%**

**Water Insoluble : 0.05%max.**

**PH Value (1% of the solution) : 6.0 ~ 7.5**

Packaging: 25kg net in kraft paper bag lined with weaving cloth, and the polyethylene bag inside,or as per customer's requirements.

Storage: Can be stored in a normal warehouse area.
