

**Product Name: EDTA-CA-9**

**Chemical Name: Ethylenediaminetetraacetic acid, calcium disodium complex**

CAS No: 62-33-9

Formula: EDTA-CaNa<sub>2</sub>(C<sub>10</sub>H<sub>12</sub>N<sub>2</sub>O<sub>8</sub>CaNa<sub>2</sub>)

Molecular Weight:: 374.27

Characteristics & Application: It is a stable water soluble metal chelate, mainly used In food industry, agriculture and horticulture as micronutrient, and calcium is present in a chelated form.

**Appearance : White Powder**

**Calcium Chelated : 9.3%**

**Water Insoluble : 0.05%max.**

**PH Value(1% of the solution) : 6.0 ~ 7.5**

Packaging: 25kg net in kraft paper bag lined with weaving cloth, and the polyethylene bag inside, or as per customer's requirements.

Storage: Can be stored in a normal warehouse area.
