CHROME OXIDE GREEN

- **Molecular formular:** Cr₂O₃
- **Specific gravity:** 5.21
- **Chracter:** Brownish red flakes, soluble in water and ether,poisonous.
- **Usage:** It is mainly used for smelting metal chromium and chromium carbide It is used ascolouring agent for cocor paintingon enamelware and porcelainware,imitation leather or buidingmaterial It i also used formaking sun-proof coating,abrasive,green polishingcompound and special printing inkfor printing bank note.It is usedas catalyst for organic syntheticchromium
- **Specification:** Cr₂O₃ : 99.0%min
 - Water content: 0.10% max
 - Water soluble matter: 0.20 % max
 - Oil absorption: 15-25% max
 - Residue on 325 Mesh: 0.3% max
 - Ph: 6-8
 - Cr₂O₃ : 98.0%min
 - Water content: 0.15% max
 - Water soluble matter: 0.20% max
 - Oil absorption: 15-25% max
 - Residue on 500 Mesh: 1% max
 - Ph: 6-8
- **Packing:** 25kg plastic weaving bag.
