

Product Name: EDTA-FE-13

Chemical name: Ethylenediaminetetraacetic acid, ferric sodium complex

CAS No: 15708-41-5

Formula: EDTA-FeNa·3H₂O (C₁₀H₁₂FeN₂NaO₈)

Molecular Weight:: 421.1

Characteristics & Application: It is a stable water soluble metal chelate, mainly used in agriculture and horticulture and iron is present in a chelated form.

Appearance : Yellow Crystalline Powder/Microgranular

Iron chelated : 12.5%

Water Insoluble : 0.05%max.

PH Value (1% of the solution) : 4.0 ~ 6.0

Packaging: 25kg net in kraft paper bag lined with weaving cloth, and polyethylene bag inside, or as per customer's requirements.

Storage: Can be stored in a normal warehouse area.
